PROMOTAL MEDCONNECT

PART OF ELOI GROUP

- 101 years of experience
- 6 sites in France
- 110 collaborators
- €20m in revenue
- ELOI Group is leader for all equipment needed for practitioners to open a practice in France
- Our mission is to provide Premium products and services to medical practitioners in order to carry out consultations by integrating innovative technologies that contribute to its sustainable development. This vision will be implemented thanks to the involvement and skills of our teams

OUR HISTORY

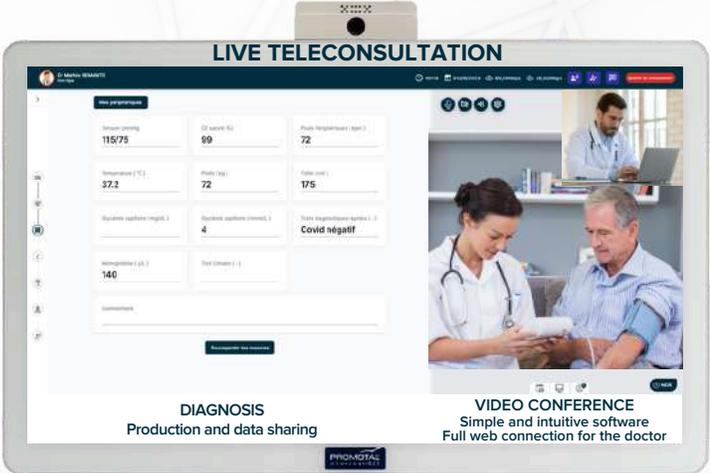

- ELOI Group Subsidiary
- ELOI Group wanted to build a hub for connected medical equipments
- Promotal MedConnect solution has been sold since January 2022
- +100 systems installed in France, West Africa, Switzerland and Remote French Islands (New Caledonia)

A PERFECTLY INTEGRATED SOFTWARE PLATFORM

With Promotal MedConnect solutions, you can bring a point of care anywhere, whether it's a rural clinic you want to open/ enhance, or through home visits.

Thanks to medical equipment, the doctors/ health organization, can bring quality care to the patient more easily.

This allows Promotal MedConnect to fit for multiple uses such as General practitioners, Point of care testing, Specialized clinics...

BASIC EQUIPMENT

RCS 100 RIESTER CAMERA

OUR HARDWARE MEDCONNECT 360°

MedConnect 360° Heavy Duty

A Mobile Revolution in Patient Care. Designed for health professionals, this portable solution integrates top-of-the-line diagnostic equipment enabling high-quality remote consultations. Enhance patient access to care with our easy-to-use, comprehensive telemedicine kit.

MedConnect 360° Nomad

Portability and mobility: our bag is designed to be lightweight and easy to carry. Access to care in remote areas. Complete equipment: for remote medical diagnosis, including basic measuring devices such as blood pressure monitors, thermometers, electronic stethoscopes, etc.

MedConnect 360° Station

Combining ergonomics, advanced technology and ease of use, our cart is designed to transform every space into a state-of-the-art telemedicine station, adapted to the needs of modern healthcare professionals.

MEDCONNECT 360° ADVANCED DEVICES

TELERADIOLOGY

Products advantages

- 1 Expanded Clinical Coverage**
All parts of human body including adult chest, pelvis, abdomen, hands, feet and head
Setp up time under 1 minute
- 2 Minimized Radiation Exposure/Reduce Time**
Low dose product design and mechanism minimized radiation exposure for operators and patients
Image acquisition under 3 seconds
- 3 Patented Adjustable Active Area Collimator**
Patented Collimator reduce leakage and scatter radiation
- 4 Superior Quality X-ray Image**
70 kV : Improve image penetration
>Improved bone identification
6mA : Reduce requires irradiation time
>Reduces motion blurring
0.4 mm Focal Spot > High resolution
- 5 Led and Laser Guided Bean Function**
Help users to pinpoint accurate exposure area

Portable X RAY camera

- High Resolution**
- Light Weight**
- Low Dose**
- Wireless Smart Control**

GYNECOLOGY

Ultrasound scanners EDAN

Products advantages

- 1 High resolution and visibility**
15.6-inch medical LCD screen with high resolution and 180-degree viewing angle, offering excellent visibility at different angles.
- 2 Intuitive operation**
Sensitive 10.1-inch touchscreen for fast, efficient operation, with easy access to essential functions.
Innovative user interface with a clear layout of functions, facilitating precise and simplified use of the system.
- 3 Portability and durability**
Lightweight magnesium alloy body weighing just 4.5kg, making it easy to transport and use in a variety of clinical environments, while ensuring greater durability.
- 4 Autonomy and Quick Start**
Unique dual-plug, dual-battery design for extended working autonomy of up to 2 hours and quick start-up in less than 30 seconds.
- 5 Automatic optimisation**
eOptimized function for one-click optimisation in different modes, improving imaging efficiency.
- 6 Easy automatic measurements**
PW automatic tracking, for fast automatic measurements at the touch of a button.
- 7 Data Storage and Transfer**
Large storage capacity with USB transfer, for easy, secure data management.
- 8 Efficient gesture control**
eTouch, effective 'Swipe' gesture control, improving interaction with the system.

BLOOD GAS AND CHEMISTRY ANALYZER

Products advantages

- 1 Portable, lightweight**
Capable to run 50 samples with fully-charged battery Diagnose at the point of care, patient side, out in the field or exam room
- 2 Easy, Quick and Convenient**
Zero maintenance Minimize hands on time and training requirement Auto-sampling Report is ready within one minute after sample aspiration
- 3 Accurate and Reliable**
Innovative microchip liquid control technology and micro-sensor multifunction membrane technology High sensitivity and accuracy Calibrator, Control and Electronic simulator to TRIPLE guarantee the RESULTS!
- 4 Flexible Data Management**
Acquire patients' information via barcode/QR code Up to 10,000 patient data storage 4 USB ports and LAN/WiFi for data management Optional data management software
- 5 Multi-parameter cartridge**
Multi popular time-sensitive parameters come in one cartridge, including ABG, electrolytes and metabolites Single-use cartridge avoids contamination Room temperature storage with long shelf-life

POCT EDAN

FIA TESTING SYSTEM

Fluorescence Immunochromatography - VivaDiag

VivaDiag

Products advantages

- 1 User-Friendly Touchscreen Interface**
The 7-inch color LCD touch screen makes operation intuitive and easy
- 2 Multi-Parameter Testing**
Can detect cardiac markers, tumor markers, infections, renal function, diabetes, hormones, and more, making it versatile for various diagnostic needs
- 3 Fast & Efficient with Built-in Printer**
Eliminates the need for external printing, allowing quick and convenient result documentation
- 4 High Storage & Connectivity**
Stores up to 10,000 results and supports USB & Ethernet connectivity for seamless data transfer
- 5 Versatile Sample Compatibility**
Works with whole blood, serum, plasma, urine, hair, etc., making it suitable for diverse medical applications
- 6 Compact and Portable Design**
Weight : 1.8 kg
Dimensions : 192 × 209 × 169 mm

PNEUMOLOGY

Products advantages

1 General Features:

Compact & Lightweight: Weighing just 65g with dimensions of 142x49x26 mm, making it highly portable.

Simple & Reliable Connectivity: Uses a standard USB cable for easy PC connection and data transfer.

Alimentation: Works via the USB port

Temperature sensor: Semi conductor, operating in a range of 0° to 45°

Flow sensor: Bi-directional digital turbine for accurate measurement of air flow

Precision:

- Volume: $\pm 3\%$ or 50 mL.
- Flow rate: $\pm 5\%$ or 200 mL/s

Dynamic resistance: Less than 0.5cm H₂O/l/s to 12L/s, ensuring a comfortable measurement for the patient.

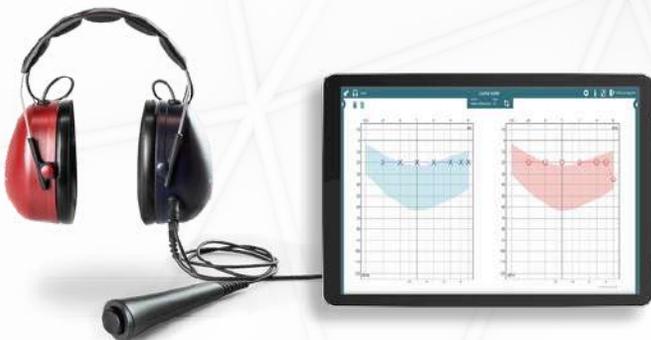

USB MIR-Spirometer

TELEAUDIOLOGY

TiLuna USB Plug & Play Audiometer

Products advantages

1 Plug and Play:

The simple connection with a USB headset and a Windows® tablet or laptop allows immediate start of testing without complex setup.

2 Portability:

Weighing only 500 grams, the Luna is easily transportable in the included carrying case, making it ideal for home visits or traveling between test sites.

3 Speed:

Automated tests with plug-and-play functionality enable rapid examinations. An automatic random test with the default seven frequencies takes approximately one minute to complete.

4 Reliability:

Compliant with Type 4 according to IEC60645-1, presenting frequencies in a randomized order for more reliable results.

COMPLIANCE & DATA SECURITY

Promotal MedConnect knows that because it handles Patient Health Information it must be submitted to a high data security standard.

Currently Promotal MedConnect is:

1

GDPR COMPLIANT

2

HIPAA COMPLIANT

3

ISO27001

4

MEDICAL EQUIPMENTS

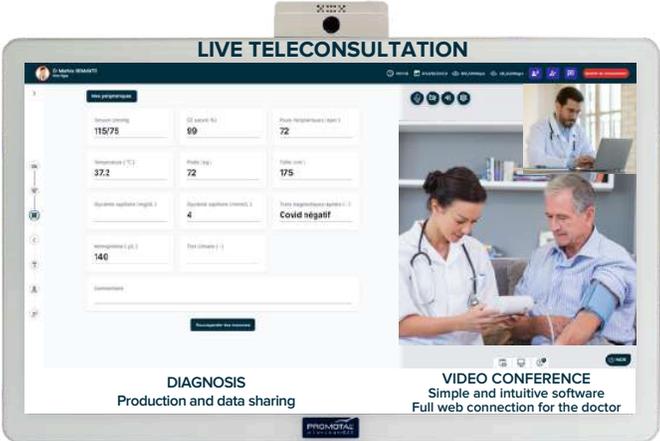

All equipment sold are CE / MDR medical devices and FDA approved:

INTEGRATED PARTNERS:

A NEW TYPE OF CONSULTATION:

Our innovative consultation module supports a variety of diagnostic equipment, offering an enriched consultation experience with dual displays for continuous interaction with the remote physician. You can record, annotate and transmit equipment data in real time, invite other doctors to join the consultation and benefit from our advanced file management tools.

Book your free demo right now by contacting us.

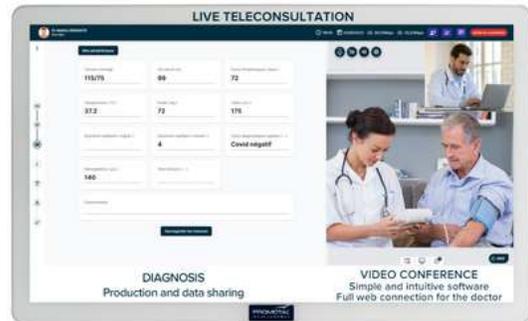

“Open a profitable telemedicine clinic that brings specialist care to underserved areas”

Why Choose Promotal MedConnect?

Many communities struggle with limited access to both primary and specialist care, leading to fragmented patient journeys and long wait times.

Our Solution

Promotal MedConnect offers a unique telemedicine model that supports the complete patient journey, from initial general consultations to specialist follow-ups, all in one clinic.

Key Features

- Assisted remote consultations with a nurse present
- Integration of multiple medical devices (stethoscope, ECG, ultrasound)
- Proven profitability (13 000 \$ per month with 2 clinics)
- Complete software platform: Seamlessly manages consultations, device data, and patient records

How It Works

- 1 Patients visit local Promotal MedConnect clinics staffed by trained nurses
- 2 Nurses conduct initial assessments using our advanced medical devices
- 3 Patients connect with general practitioners via high-definition video conferencing for primary care
- 4 If needed, specialists can be brought into the consultation immediately or scheduled for follow-up
- 5 Nurses assist during all consultations, operating connected devices as directed by the remote doctors
- 6 Doctors diagnose and create treatment plans in real-time
- 7 Nurses perform any necessary follow-up tests on-site

The Opportunity

For Patients

- 1 Access to both primary and specialist care in one local clinic
- 2 Comprehensive examinations with advanced medical devices
- 3 Reduced travel and waiting times
- 4 Seamless referrals and follow-ups

For Healthcare Providers

- 1 Expand your practice reach without physical relocation
- 2 Collaborate easily with other healthcare professionals
- 3 Access to real-time patient data and connected devices
- 4 Gain efficiency: Optimize your time and resources by seeing more patients without increasing physical infrastructure
